BONUS REBATE!!! Lighting 50% increase!

Efficiency Works is offering a **50% bonus rebate** on all lighting upgrades that are **pre-approved, completed and submitted for payment** between August 15, 2017 and November 15, 2017 for commercial customers in **Estes Park, Fort Collins, and Longmont** (bonus does NOT apply in Loveland). All final rebate applications and supporting documentation must be submitted on or before November 15, 2017 to qualify. Applications submitted after this time will be accepted for the standard rebate offering, dependent on available funding. Applications must be submitted on the Efficiency Works Business Rebate Application version 17.6 or newer, download the newest version from <https://efficiencyworks.co/for-business/>.

Lighting upgrades that have been pre-approved prior to August 15, 2017 do NOT qualify. Applications submitted for locations served by Loveland Water and Power will be accepted at the standard rebate offering, depending on available funding.

Lighting Bonus Rebate details and requirements:

- The project site must be an electric commercial customer of Town of Estes Park Light & Power Department, Fort Collins Utilities, or Longmont Power & Communications. Bonus rebate does NOT apply to Loveland Water and Power customers.
- 50% bonus rebate only applies to lighting upgrades. All other efficiency upgrades are subject to the standard rebate offerings.
- Applications must be submitted on the Efficiency Works Business Rebate Application version 17.6 or newer. Download the newest version from <https://efficiencyworks.co/for-business/>.
- Pre-approval is required for all projects with a rebate greater than \$1,000.
- Exterior light fixtures must comply with local land use code, which may require the fixtures to be full cutoff.
- Incentives will be capped at 100% of project total cost.
- Any customer receiving more than \$10,000 in incentives in a calendar year may be required to have a facility assessment. This is provided to the customer for free, but must be completed prior to pre-approval. Any customer that has received a facility assessment in the past three years is exempt from this requirement, but **will** be required to have energy advising. Again, this is provided to the customer for free, but must be completed prior to pre-approval.
- Annual rebate maximums per customer apply, they are:
 - \$50,000 per customer per site per year up to \$100,000 per customer per year for customers with multiple sites. Multiple sites must be physically located in different locations and not be adjacent to one another.
 - Exceeding the rebate cap for any given project, customer, or site will be evaluated on case by case basis depending on available budget, energy savings and timing of projects.

For more information or help completing the rebate application, call 877-981-1888 or e-mail info@EfficiencyWorks.CO.
